

The logo for ipns, consisting of the lowercase letters 'ipns' in white on a blue square background.

## AUTOMOTIVE

Our client is a fleet management company operating on a nationwide basis. They provide the delivery and management of vehicles to companies throughout the UK.

They have several sites around the UK holding thousands of vehicles at any one time and they wanted a system that would not only help them to secure these sites but also aid in the logistical management of their vehicles.

A variety of HikVision IP cameras were deployed around the sites at key operational areas along with number plate recognition cameras at site entrances and exits. This provided a complete visual narrative of a vehicle's journey around their sites and helped the client to back up their vehicle management system with video footage if required.
