

The logo for ipns, featuring the lowercase letters 'ipns' in white on a blue square background.

HOSPITALITY

Our customer runs a hotel and golf complex in Oxfordshire and they wanted an access control system that could be used across different buildings and the different types of business that it ran in those buildings.

The issue was that some of the buildings were quite remote and also, that the customer had also got an existing system that they used to access the hotel rooms.

Because IPNS have skill sets in both networking and access solutions, we were able to provide a fibre optic solution for the remote buildings and supply a system that would be compatible with the client's existing access cards, so that a single card or fob could be used on both systems.
